

FRESH MEDICAL SPA MISS EARTH CANADA SPONSORSHIP

Pollution, resource depletion, land degradation, ozone depletion... The list goes on! Although it seems that these issues may be out of our control, Miss Earth Canada delegate, Jaclyn Miles has a different take on how we can save our planet. On August 17th to the 19th Jaclyn will be competing in Montreal, Quebec to become this year's Miss Earth Canada which is an organization that selects young women across Canada to speak up about environmental issues that we face today and what we can do to correct these issues.

Jaclyn has spent the last year doing volunteer work for her community. She does environmental walks with children and adults at Silver Birches Campground and is also in charge of an environmental club at Ecole St Jean Baptiste in Amherstburg along with her coworker where they teach children about environmental issues. She has also donated to the World Wildlife Fund to protect 2 acres of Rainforest. But her work does not stop there! If Jaclyn is chosen to become this year's Miss Earth Canada she plans to visit Canadian grade schools and encourage children to create their own environmental clubs so that they can learn about their ecological footprint and how to prevent future devastation to our planet. Jaclyn feels that prevention and knowledge are the key to making a change.

Along with all of the volunteer work Jaclyn does, there is quite a bit of preparation involved prior to the pageant itself. All of the delegates must prepare a speech about their platform which will be judged in the "Beauties for a Cause" section of the pageant. "A lot of people have negative stereotypes against pageants" says Miles, "they seem to think that we are all being judged on how pretty we are but they don't take into account all of the research and planning the delegates do in preparation for the event". Jaclyn says she has spent days preparing her speech "Your speech really has to make an impact to influence people to make a change".

Of course there is also the beauty aspect of the pageant. The delegates will be judged based on the evening gown competition, the talent competition and of course the bikini competition. Jaclyn has been working hard to stay in shape and has already lost over 15 pounds!

Jaclyn has been coming to our spa for the last few months to help tone her body for the competition. While using the Ion Magnum she has lost 5 pounds and a total of 4 inches. See her before and after pictures:

There is a significant difference after just 5 treatments! "It just goes to show that the Ion Magnum is for everyone! Whether you just want to tone up for bikini season, or you're trying to loose weight, this system works!"

Fresh Medical Spa is sponsoring Jaclyn in her journey in becoming Miss Earth Canada. She will be receiving Ion Magnum and IEllios treatments during her pageant.
